SOLUTIONS AND ENVIRONMENTAL PRODUCTS
WATER - SOIL - AIR

Quality
Commitment
Expertise

MISSION STATEMENT

Design, manufacture and distribute quality products and solutions that contribute to the protection of the environment and sustainability of our air, water and soil resources.

HISTORY OF THE COMPANY

Founded in 1988, **Chemco inc.** is a Canadian family owned business working in the Environmental sectors. In 1991, Chemco inc. inaugurates its first ferric sulphate manufacturing plant in the Saint-Augustin-de-Desmaures industrial park, a suburb of the historic city of Quebec. Since then its operations have expanded to include the manufacture of high quality aluminum sulphate. These inorganic coagulants are designed for the treatment of potable water and wastewater in municipal and industrial applications. Manufactured under strict production and quality control guidelines, our coagulants are certified by NSF as meeting their Standard 60 for products used for the treatment of potable water.

Over the years, Chemco inc. has continued its growth as a supplier of environmental products and solutions in the following area of expertise:

- **Water**
Water & Wastewater treatment as well as Sludge dewatering;
- **Soil**
Soil and groundwater remediation treatment;
- **Air**
Atmospheric emissions and odour control.

These divisions establish Chemco inc. as a multi-disciplinary leader in supplying products and solutions dedicated to the protection of the environment.
